Comments from past participants...

In answer to the question **How will your learning from this workshop impact your job effectiveness, productivity or business results?**

It's a tool that will assist me in the delivery of all intercultural training.

Adds to the general kit of knowledge; possibly useful in assisting to sort some conflict issues.

Better equips me to present this learning to groups.

Enables me to facilitate learning of this model throughout our multicultural work environment.

Increase in knowledge will open up new opportunities.

Will do more with this in our school and make a start in corporate world.

Provides a new service and product to clients existing and new.

Increases my ability re recognise key points in any good cross-cultural facilitation that I need to organise.

Provides me with a framework to offer teaching staff. It gives me confidence to continue offering the workshops I currently offer.

Enables me to develop strategies for immediate application in teaching and learning environments.

Improves my ability to form relationships with clients/colleagues from other cultures.

Confirms my instinct for bridging (now that I know what bridging is) and gives me the language.
